Introduction

Retirement planning means preparing today for your future life so that you continue to meet all your goals and dreams independently. This includes setting your retirement goals, estimating the amount of money you will need, and investing to grow your retirement savings.

A retirement plan is designed to take care of your post-retirement days and help you lead a stress-free life. One such type is a retirement savings plan, which helps to grow your money and provide a regular income for life. Such plans help you set aside some amount towards your retirement while you are still working.
